Education

2015-2018	Postdoc	Fred Hutchinson Cancer Center, Seattle WA <i>Mentor:</i> Joshua T Schiffer
2010-2015	PhD Physics	Dartmouth College, Hanover, NH <i>Mentor:</i> John B Weaver
2009	Study abroad	University of Otago, Dunedin, NZ
2006-2010	BA Physics	Colby College, Waterville, ME

Academic positions

2025-	Principal Staff Scientist , Vaccine and Infectious Diseases Division Fred Hutchinson Cancer Center, Seattle, WA.
2023-	Affiliate Assistant Professor , Department of Global Health University of Washington, Seattle, WA.

Service

2018-2024	External Mentors Chair , Hutch United Fred Hutchinson Cancer Center, Seattle, WA.
2023-	Secretary/Treasurer , Immunobiology, Infection (IMMU) Subgroup Society of Mathematical Biology.

Past

2022-2025	(Sr) Staff Scientist , Vaccine and Infectious Diseases Division Fred Hutchinson Cancer Center, Seattle, WA.
2019-2022	Associate in VID , Vaccine and Infectious Diseases Division Fred Hutchinson Cancer Center, Seattle, WA.

Active research funding

2019-2025	NIH/NIAID K25 AI155224. Role: PI, Amount: \$615,150 Simulating persistence and elimination of the HIV reservoir.
2023-	NIH/NICHD R01 HD023412. Role: co-I, Amount: \$3,791,919 (10%) Pediatric HIV reservoir determinants and consequences.
2024-	NIH/NIAID R01 AI186721. Role: PI, Amount: \$4,345,603 Phylogenetic mechanisms of HIV reservoir seeding and maintenance.
2025-	NIH/NIAID R37 AI150556. Role: co-I, Amount: \$3,356,104 (15%) Determinants of reservoir contraction and expansion in vivo, ex vivo, and in vitro.

Honors and awards

2020 NIH K25 Mentored Quantitative Research Development Award
2019 KL2 Scholar's Club, Institute for Translational Health Science (ITHS)

2019 New Investigator Award, Center for AIDS Research (CFAR)
2018 WRF Postdoctoral Fellowship, Washington Research Foundation
2018 STEP Fellow (Science Teaching Experience for Postdocs)
2017 Landahl-Busenbergs award, Society of Mathematical Biology
2015 First prize for Graduate Research, Neukom Institute for Computational Science
2014 Neukom Fellowship, Neukom Institute for Computational Science
2013 Visionaries in Technology Award, Thayer School of Engineering, Hanover, NH
2010 GAANN PhD Fellowship, Dartmouth College, Hanover NH
2008 NNIN Undergraduate Research Fellowship, Harvard University, Cambridge, MA

Publications

Preprints

1. Scheck R, Melzer M, Gladkov G, Ward AR, **Reeves DB** et al. Q4ddPCR (May the Fourth Be Precise): A Flexible, 4-Target Assay for High-Resolution HIV Reservoir Profiling. *bioRxiv* 2025.07.28.667202 (2025).

Book chapters

- **Reeves DB** “Nonlinear non equilibrium simulations of magnetic nanoparticles”, in *Magnetic Characterization Techniques for Nanomaterials* (C Kumar ed.), Springer-Verlag Berlin Heidelberg, 2017.

Research presentations

Invited oral presentations

- “Modeling HIV reservoir ecology through the lens of CD4+ T cells”. Theoretical biology department at Utrecht University. Utrecht NL, May 2025.
- “HIV reservoir passenger kinetics through the lens of CD4+ T cells”. Viroscience Department at Erasmus University. Rotterdam NL, May 2025.
- “Modeling HIV Reservoir Evolution”. VIDF Faculty Retreat New Voices Talk. Kirkland WA, May 2024.
- “HIV Reservoir Evolution”. Infectious Disease Science Research in Progress. Seattle WA, March 2024.
- “HIV reservoir clonality and decay dynamics in context—Modeling reservoir dynamics”. BEAT HIV Collaboratory Seminar, joint with Dr Annukka Antar. Virtual, March 2024.
- “HIV Passenger Kinetics during CD4 T Cell Subset Proliferation and Differentiation”. University of Washington Sexually Transmitted Infectious Symposium. Seattle WA, Feb 2024.
- “The passenger hypothesis, HIV persistence during suppressive ART”. Kenya Research and Training Grant Presentation. Seattle WA, June 2023.
- “Impact of misclassification on HIV reservoir quantification”. Bill and Melinda Gates Foundation HIV Cure Consortium. Seattle WA, December 2022.

- “Multi-scale modeling reveals that early super-spreader events are a likely contributor to novel variant predominance”. IMAG/MSM Working Group (Multiscale Modeling and Viral Pandemics). Virtual, April 2022.
- “Unified Phylodynamic Modeling of Within-Host HIV – Red queen, red herring?”. Society of Mathematical Biology, Immunology Minisymposium. Virtual, May 2021.
- “Unified Phylodynamic Modeling of Within-Host HIV? When Is the Reservoir Created?”. SIAM Dynamical Systems, Immunology Minisymposium. Virtual, May 2021.
- “Vaccination, not vaccines, saves lives. Modeling SARS-CoV-2 in King County WA”. WHO SAGE Strategic Analysis Group of Experts – Modeling. Virtual, March 2021.
- “Vaccination, not vaccines, saves lives. Modeling SARS-CoV-2 in King County WA”. Virginia Tech MathBio Seminar. Virtual, February 2021.
- “The pathway to a unified phylodynamic model of the HIV reservoir”. University of Montreal Computational and Quantitative Biology Seminar. Virtual, December 2020.
- “The pathway to a unified phylodynamic model of the HIV reservoir”. VID D Seminar. Virtual, August 2020.
- “HIV Reservoir Clones, How They Got There, Why They Stay”. CFAR New Faces. Virtual, May 2020.
- “The impact (or not) of HIV evolution on cure”. WRF Postdoctoral Fellows Symposium, Seattle, WA, January 2020.
- “The impact (or not) of HIV evolution on cure”. Fred Hutchinson Cancer Research Center/UW Virology Symposium, Seattle, WA, January 2020.
- “Just a passenger: How natural T cell dynamics contribute to HIV persistence”. Walter Reed Army Research Institute, Silver Spring, MD, October 2019.
- “Modeling the HIV reservoir”. CFAR Cure Technology Workshop, Seattle, WA January 2019.
- “Mathematical modeling to identify mechanistic correlates and timing of breakthrough HIV infection in the AMP trial”. HVTN Investigators Meeting, Seattle, WA November 2018.
- “Just a passenger: Clues into HIV persistence through infected cell clonality”. UCSF Dept. of Experimental Medicine Inter-lab Meeting (ILM), San Francisco, CA September 2018.
- “Mathematical models of HIV: From vaccines to cure”. Fred Hutchinson Cancer Research Center Infectious Diseases Sciences Faculty meeting, Seattle, WA April 2018.
- “HIV dynamics: Barriers and opportunities for cure”. Fred Hutchinson Cancer Research Center VID D Seminar, Seattle, WA March 2017.
- “Within-host modeling of HIV cure”. Institute for Disease Modeling Spotlight Talk. Seattle, WA August 2016.
- “Modeling HIV cure”. Fred Hutchinson Cancer Research Center Mathematical Modeling Affinity Group. Seattle, WA March 2016.
- “Dynamics and diversity of within-host viral modeling”. University of Georgia Computational Ecology & Epidemiology Study Group, Athens, GA January 2016.
- “Dynamical systems and HIV cure”. University of Washington Postdoc Association Research Symposium, Seattle, WA November 2015.
- “How studying nanoparticles can save lives”. Colby College Physics Colloquium, Waterville, ME April 2013.

Teaching

Guest lecturer, University of Washington, Seattle WA

–PABIO 591B: History of Pandemics, Spring 2021

Responsibilities: Attended lectures, developed and presented a lecture on 1918 Flu. Reviewed student presentations.

Learning goals: This course will examine the history of pandemics from the perspective of bench scientists. Students will learn to read the literature, and examine history in terms of primary sources that illustrate how scientific approaches are advancing our understanding of history or how history has advanced our understanding of the science.

Co-instructor, University of Washington, Seattle WA

–BIOL 485B: Clickbait health claims, Summer 2018

Responsibilities: Co-developed a course with 2 other STEP fellows. Met 3x weekly with 15 upper-level undergraduate student biology majors. Co-instructors rotated through weekly lectures, writing and grading homework, and managing Canvas.

Learning goals: Students will learn to read and critically engage with mass media by finding reputable primary sources, reading scientific literature, evaluating charts and statistical analysis.

Teaching Assistant, Dartmouth College, Hanover NH

–P43: Statistical Physics and Thermodynamics, Fall 2014

–P43: Statistical Physics and Thermodynamics, Fall 2015

–P33: Biophysics, Winter 2013.

Responsibilities: Personal office hours 2x weekly for 10-20 upper-level undergraduates student physics majors. Graded homework and exams. Managed coursework and course website.

Teaching & Laboratory Assistant, Dartmouth College, Hanover NH

–P13: Introductory Physics for majors I (Mechanics), Fall 2010

–P14: Introductory Physics for majors II (Electricity and Magnetism), Winter 2010

Responsibilities: Guided 3hr laboratory experiments (10-20 students) and recitations to review class work for first year physics students. Graded weekly problem sets, midterms, and final exams for 60 students.

Independently organized and ran 2hr weekly homework help sessions.

Service and Outreach

- World AIDS Day Twitch Stream Guest 'Pawsitively Stitched'. Dec 1 2025
- Conference Organizer. 24 Hours to Save AIDS Research. Virtual, Sep 2025
- Session Chair. 33rd Dynamics and Evolution of Viruses. Abbaye Royaumont FR, May 2025
- Organizer Fred Hutch Infectious Disease Sciences Symposium March 2025
- UW Dept Global Health MPH Admissions committee, January 2025
- Fred Hutch DEI Core Delegate for Annual Symposium, June 2024.
- Organizer Fred Hutch Infectious Disease Sciences Symposium March 2024
- UW Dept Global Health MPH Admissions committee, January 2024
- Organizer NIAID/SMB Workshop: Bridging multiscale modeling and practical clinical applications in infectious diseases. Society of Mathematical Biology (SMB) Annual Meeting, Ohio State University, Columbus OH July 2023.
- Mini-symposium organizer and chair. Society of Mathematical Biology (SMB) Annual Meeting, Ohio State University, Columbus OH July 2023.
- Fred Hutch Virtual Town Hall | COVID-19, May 2021
- SARS-CoV-2 Science, learning from HIV, Fred Hutch Philanthropy Department May 2021
- Fred Hutch planner meeting, Honors College Seminar March 2021
- Shoreline Community College, Honors College Seminar March 2021
- Session Chair, COVID-19 Dynamics & Evolution Conference II, October 2020
- Give Event: COVID-19 vaccines and treatment – Microsoft Cloud Computing, October 2020.
- Fred Hutch Donor Event, Innovators Network Happy Hour, April 2020.
- Ask a scientist panel for Bremerton Middle School, November 2019.
- Inclusivity workshop organizer: 'International scientists', May 2019.
- Inclusivity workshop organizer: 'Plugging the leaky STEM pipeline', May 2018.
- Northwest Association for Biomedical Research Science Competition Judge, December 2017.
- "Using mathematics for HIV cure". Infectious Disease Science Department Outreach to Administration Talk, March 2016.

Mentoring

Fred Hutchinson Cancer Center, Seattle WA

2024- **Lucero Rodriguez**. Postdoctoral fellow.

2024- **Beatrix Haddock**. Research scientist.

2023 **Nashwa Ahmed**. Rotating graduate student (joint with Lillie Cohn).

2021 **Makayla Pointdexter**. SURP intern. NC State biomedical engineering major, analysis and modeling of pediatric HIV reservoirs. Now in Medical School at UNC Chapel Hill.

2019 **Arielle Aiken**. UW Senior Biology major, Analysis of deep-mutational scanning data.

2018 **Annie Li**. Forest Ridge HS Senior honors project, Impact of blood transfusions on HIV epidemiology in China.

2018 **Cameron Ashton**. Seattle Pacific University Summer student. HIV phylogenetic reservoir studies and data compilation from online databases using R.

2018 **Ajay Arora**. STEMM Prep Student (Preparing Minority Students for Careers in Science Technology Engineering Math and Medicine). Modeling MMF therapy and data fitting using Python.

2017 **Rebecca Drachman**. Lakeside HS Student. Modeling AMP study using simple HIV within host

model.

University of Washington, Seattle WA

2024- **K. Lionel Tukei**. Bioengineering PhD Student external committee member.

Dartmouth College, Hanover NH

2013 **Michael Kane, Felicia Hammer, Anna Haron**. Managed and oversaw design and building of novel magnetic spectrometry apparatus. Carried out joint experiments.

2012 **Ethan Forauer, Ben Fiering**. Cooperatively designed new apparatuses and performed experiments. Ethan contributed authorship to a paper in *Physics in Medicine and Biology*.

2011 & 2012 **Esra Kuehlert**. Cornell University undergraduate. Helped manage and conduct experiments. Work resulted in a first author publication for Esra in *Medical Physics*.

Additional education and courses

- Native American Cultural Competency Training, WA State Governor's Office of Indian Affairs, Fred Hutchinson Cancer Research Center, Seattle, WA
- 9th Summer Institute in Statistical Genetics, University of Washington, Seattle, WA
- Future Faculty Fellows Workshop, University of Washington, Seattle, WA
- 8th Summer Institute in Statistical Genetics, University of Washington, Seattle, WA
- 7th Summer Institute in Statistics and Modeling in Infectious Diseases, University of Washington, Seattle, WA
- Nonlinear dynamics: mathematical and computational approaches. MOOC, Sante Fe Institute, Sante Fe, NM
- Introduction to nanotechnology. Summer lecture series, Harvard University, Cambridge, MA

Conference and travel scholarships

- Keystone Symposia Scholarship, Progress and Pathways to an Effective HIV Vaccine (J6)
- Travel Award, Hutch United
- Keystone Symposia Scholarship, Modeling Viral Infections and Immunity (E1)
- SISIMID Summer School Scholarship, UW Department of Biostatistics
- Graduate Student Travel Award, American Physical Society
- Graduate Travel Award, Neukom Institute at Dartmouth College

- Student Travel Award, Dartmouth College Graduate Studies

Ad hoc referee

Biomedical: Nature Medicine, Nature Communications, eLife, Proceedings of the National Academy of Sciences, PLoS Pathogens, PLOS Computational Biology, Journal of the Royal Society: Interface, Frontiers in Immunology, Nature Scientific Reports, Journal: HIV/AIDS - Research and Palliative Care, Mathematical Biosciences and Engineering, Annals of Epidemiology, Global Public Health, Biophysical Journal

Physics: Applied Physics Letters, SIAM Journal on Applied Mathematics, Journal of Applied Mathematics and Computing, Journal of Applied Physics, Medical Physics, IEEE Transactions on Magnetics, International Journal of Thermal Science, Acta Physica Polonica, International Journal of Magnetic Particle Imaging, Sensors

Professional membership

2016- SMB Society of Mathematical Biology

2009- APS American Physical Society

2020-2022 AMS American Society for Microbiology

2014-2020 SIAM Society for Industrial and Applied Mathematics

2016-2019 NPA National Postdoctoral Association

2013-2015 MRS Materials Research Society

Computational fluency

Expert: Python, Matlab, LaTeX, SVG editing, Monolix

Experienced: C/C++, Unix, Mathematica/Maxima, R, html, Bayesian phylogenetics
